

Valëza Mustafa

Date of birth: 19/03/2005 | Place of birth: Prishtine, Kosovo | Gender: Female | Nationality: Kosovar | Phone: (+383) 49360448 (Home) | Email address: valzamustafa3@gmail.com | LinkedIn: <https://www.linkedin.com/in/valza-mustafa-0352a62a6/> | Portfolio: <https://valza-portfolio.netlify.app/> | Address: Emshir-Rrahim Gërrbeshi, 10000, Prishtine, Kosovo (Home)

About myself

Motivated **Computer Science and Engineering** student with a deep passion for **full-stack web development**. Proficient in **front-end technologies** including HTML, CSS, JavaScript, and ReactJS, Next JS as well as **back-end frameworks** such as PHP and .NET with database management in **MSSQL, Postgree SQL** and **phpMyAdmin**. Dedicated to creating efficient, user-friendly, and visually engaging web solutions. Eager to apply technical expertise, creativity, and problem-solving abilities in practical projects and professional environments.

Education & Training

Computer Science and Engineering-Bachelor | "UBT College" | 05/10/2023 - Current | Prishtine, Kosovo

Thesis: Software Engineer

Full Stack Developer | Tectigon Academy | 01/05/2024 - 01/07/2024 | Prishtine, Kosovo

-Web Technologies: **HTML, CSS, JavaScript, PHP, phpMyAdmin**

-Full-stack development: Responsive and dynamic web pages, front-end & back-end integration

-Role-based functionalities, data management, user interaction design

Digital Transformation and AI | Women In Tech | 01/03/2025 - 04/04/2025 | Prishtine, Kosovo

Work experience

Software developer | Starlabs | 08/09/2025 - 08/11/2025 | Prishtine, Kosovo

.NET Developer

Internships

Full Stack Developer | 10/07/2024 - 10/08/2024

-Completed a **Full Stack Developer internship** applying skills in **HTML, CSS, JavaScript, PHP, and phpMyAdmin**.

-Developed **responsive and dynamic web applications** with two roles (Admin and User), including **data management, user interactions, favorites, notifications, and admin control functionalities**.

-Gained hands-on experience in **front-end and back-end development, debugging, problem-solving, and implementing user-friendly interfaces**.

Skills

Front-end Developer with ReactJS | HTML (Basics) | CSS | Bootstrap and Tailwind CSS | JavaScript | Java (computer programming) | Dotnet Framework | MSSQL, MySQL, SQLite | EntityFramework Core | Agile software development methodologies | DataStructures/Algorithm | PHP | Postgree SQL | NextJS | C#

Projects

Scholarship System | 01/05/2025 - 05/06/2025

Developed a full-stack Scholarship Management System with **React, Bootstrap, Entity Framework, and MS SQL Server**.

Implemented **role-based access** for **Administrators, Providers, and Students**, supporting dynamic authentication with **access and refresh tokens**, as well as **password reset via email verification**.

Enabled **Administrators** to manage providers and scholarships, monitor applications, download applicant documents, and assign scholarship grants.

Enabled **Providers** to create scholarships, review student applications and uploaded documents, and provide direct feedback.

Enabled **Students** to browse and apply for scholarships, manage their profiles, track application history, and

communicate with providers through an integrated **chat system**.

Added **real-time notifications** for all user roles and implemented secure document handling and email-based password recovery.

Designed a **responsive, user-friendly UI** ensuring smooth interaction between the front-end and back-end.

MediTrack | 08/09/2025 - 08/10/2025

MediTrack is an advanced healthcare system built on a microservices architecture to offer medication tracking, appointment scheduling, and health monitoring. I contributed to developing the **MedicationService** and **UserHealthService**, ensuring seamless communication using **REST APIs** and **gRPC**. The platform includes intelligent medication reminders, drug interaction checks, and real-time symptom tracking, with robust data management through **Entity Framework Core** and **SQL Server**. This project emphasized scalability, maintainability, and efficient healthcare coordination through a clean, domain-driven design.

AutoSalloni Maidonn | 01/09/2025 - 10/11/2025

Developed a modern web application for managing and showcasing vehicles for a car dealership. The platform provides dynamic listings of cars and brands, detailed vehicle information, and a user-friendly interface .

The backend is built using .NET (ASP.NET Core), implementing a clean RESTful API, structured business logic, and secure data handling. The frontend is developed with Next.js and TypeScript, delivering a responsive, fast, and scalable user experience.

Data persistence and management are handled using PostgreSQL, ensuring data integrity, high performance, and scalability. The project follows modern software development best practices and a client-server architecture.

autosallonimaidonn.com

Tourism Hub Kosovo | 14/11/2025 - 19/12/2025

A comprehensive web platform that centralizes and promotes tourism activities, cultural events, and festivals across Kosovo. The system provides real-time event information, activity management for organizers, and integrated ticket purchasing, solving the challenge of scattered information across social media platforms.

Key Features:

- Real-time event discovery and updates
- Centralized platform for all tourism activities in Kosovo
- Event management dashboard for organizers
- Integrated ticket booking and payment system
- Organized information for cultural events and local attractions
- Accessible to users not active on social media
- Responsive design with Tailwind CS
